Subject: RE: Action items: EPA-wide IRIS discussion

Hello Norm,

OPP had hoped to provide comments to you on the draft non-cancer weight-of-evidence descriptors by this Friday, but key players have been busy with various meetings and preparing responses to the recent IARC assessments of glyphosate and other pesticides. We hope to have comments to you by the end of next week (April 10).

Ray

Subject: Action items: EPA-wide IRIS discussion

Hello

Here are open action items from the last two IRIS discussion calls that focused on weight-of-evidence descriptors for non-cancer effects and the developing IRIS assessments on PCBs and arsenic.

- If you would like to participate in a follow up discussion on the presentation of **arsenic** toxicity results, please let me know. We will send an example of a potential approach to convey a range of arsenic toxicity values to those who would like to participate in a further discussion.
- Please send comments on the previously sent draft **PCBs** scoping and problem formulation by no later than April 6th. Send your comments to Norman Birchfield, Samantha Jones, and Gina Perovich.
- Please send any comments on the draft **non-cancer weight-of-evidence descriptors** to Vince Cogliano and Norman Birchfield by April 3rd.
- The next EPA-wide **IRIS discussion meeting** will be rescheduled to Monday, April 6th from 3-4 pm EDT. Due to multiple conflicts there are very few possible options.

Please let me know if you have any questions.

Norm
